

OUR MATHS VISION:

Anybody and everyone is a mathematician at Oakmeadow.

NOT YET! We don't use 'I can't' and we always think...I haven't got it YET!

We give maths a real purpose...

To secure independent thinkers in maths, with interdependence and a drive to work it out...

***Maths aims at
Oakmeadow:***
(Our commitment to maths)

We understand the importance of exploring and discovering... in different groups with different people.

Working together as a team...investigating...

It's the process that matters, not the winning answer...

We have a risk it and see to develop resilience and enjoy puzzlement
